WORK EXPERIENCE

Happy Jack – Livingston, NJ   April 2020 – Present

Technology Advisor and Website Contributor

- Created the framework and overall layout of the website www.happyjacksworld.com
- Used backend data from shopify to drive sales and promotions
- Utilize new knowledge of information management and application development to help in ways that benefit this cause.

Butterfly Burger – Sedona, AZ   December 2020 – June 2021

Host, Expeditor, and Busser

- Gained proficiency in diagnosing issues with Toast POS and utilized it to process customer transactions, send orders to the kitchen, and communicate important data with managers.
- Opened up and closed down the restaurant. Cleared and reset tables for customers. Optimized restaurant capacity during busy days by being an expeditor and host.
- Trained other staff members. Communicated directly with upper management to fix critical issues.

Mintz and Gold LLP – New York, NY   June 2019 - August 2019

Corporate Law Associate

- Developed datasets for a case involving judgements that have yet to be paid out from the events that occurred on 9/11. Communicated findings to senior lawyers who were able to settle and award the plaintiff with compensation.
- Analyzed bank statements and utilized knowledge of excel to format findings in an efficient matter. This action helped prepare the casework for clients who are preparing for corporate legal action.
- Evaluated the effect of newly passed discrimination laws in New York and what effects that change will have for the firm's clients.

Clearpool Group – New York, NY   July 2018 - August 2018

Technology Business Intern

- Utilized programming software to help in the rollout of new software version
- Initiated, wrote, and edited the training manual related to DocuSign which streamlined the company's client onboarding process.
- Utilized knowledge of Microsoft Office (Proficiency in Excel, Word, Access) in order to reconstruct databases, and improve the organization's method of storing its required agreements.

Unibot Consulting Services   Sep 2015 – June 2018
Co-Founder and CTO
● Curated an add-to-cart bot for Nike, Supreme and Shopify sites using Java, Python and twitter API. Functions include automatic page refresh, twitter scanner, auto-add to cart, information form fill out, and order verification. Marketed program on Youtube, Twitter, Facebook as well as Chrome Web Services as an extension.
● Provided SaaS service to clients wishing to use bot to secure limited releases - on a pay-per-release basis. Operated program running for up to 10 clients simultaneously with a 95% success rate.
● Provided consulting services to developers wishing to implement functions to their programs, and made software recommendations based on the needs of clients who run other add-to-cart services.
